

# Sitec AR 2

## Conductive antireflective coated glass

**Sitec AR 2** is based on pyrolytic coated floatglas which is additionally both sides interference optical coated. The glass is conductive as well as non-reflective with a good transmission.

Sitec AR 2 will be used for Displays as well as for antistatic protection.

### Technical data

---

Thickness tolerances: 4,0 mm (+-0,2)

---

Conductivity:  $\leq 10$  Ohm/Square (+-1)

---

Basis material: Float glass

---

Transmission:  $> 90\%$

---
