

# Microglass

Special purpose thin glasses

Extra-thin glasses with special processing are used for the manufacture of apparatus and in the electrical industry. Glaswerke Haller can supply a wide range of **microglasses** from thicknesses of 0.2 mm with a wide selection of finishes. **Microglasses** on the basis of soda lime glass can also be supplied in chemically hardened versions.

**Further thicknesses and glass types, e.g. thin aluminium borosilicate glasses on request.**

## Technical data

---

Thicknesses:	from 0.2 mm
Formats:	from 5 x 5 mm

---

Finishing possibilities:	cutting, grinding drilling, step grinding chemical hardening screen printing
--------------------------	---

---

Tolerances:	+/-0,2
-------------	--------

---

### Thin borosilicate glasses

Thicknesses:	0.20 mm (+/-0.1)
	0.41 mm (+/-0.1)

---

### Thin soda lime glasses

Thicknesses:	0.5 mm (+/-0.1)
	0.7 mm (+/-0.1)
	0.9 mm (+/-0.1)
	1.0 mm (+/-0.1)
