

Mirrors

Specific reflection

Mirrors, partially transparent mirrors and **coloured glass mirrors** are used for bathroom furnishings, in the furniture industry and for individual shop designs. According to their use, Glaswerke Haller can supply **mirrors** with the following finishing stages:

- Cutting
- Water jet cutting
- Grinding
- Polishing
- Drilling
- Milling
- Printing
- Sandblasting
- Bonding

All **mirrors** can be processed as laminated safety glass with the combinations mirror/mirror, or mirror/glass with full area bonding or partial bonding.

If required, bonding and/or assemblies of metal components and other materials are possible.
